SUMMARY

Data/Business Intelligence Analyst with cross-industry experience; including financial services, turning transactional and operational data into decision-ready reporting for senior leadership. Proficient in Excel, Power BI, DAX, Power Query, and Sql, with a track record of building and automating KPI dashboards, tracking performance metrics, and improving reporting accuracy, consistency, and turnaround. Strong data cleaning, validation, and structuring discipline, combined with clear communication that translates large, complex datasets into actionable insight for executives and business teams.

WORK EXPERIENCE

Freelance Business Support & Data Analyst

Oct 2025 – Present

- Analyzed operational and performance data across 10+ client organizations in healthcare, sales, HR, automotive, logistics, financial services, and other service sectors; built structured KPI dashboards and reporting cycles that surfaced trends behind a 5–12% revenue increase and 3–15% reduction in administrative costs.
- Designed, developed, and maintained 15+ interactive Power BI and Excel dashboards using DAX and Power Query, translating raw operational and financial data into clear, decision-ready reports for leadership.
- Coordinated recurring reporting workflows and documentation across clients, automating recurring reports and ensuring 100% on-time delivery and data consistency across all reporting outputs.

Assistant General Manager — Business Intelligence & Reporting

Mar 2023 – Mar 2026

- Analyzed executive budgets, expenditure trends, and performance data to prepare 12+ Board/Management reports with KPI summaries, variance analysis, and risk registers; enabling faster, data-driven executive decisions and contributing to an 8% revenue increase and 15% reduction in administrative costs.
- Built and standardized 20+ SOPs and documentation frameworks to safeguard data accuracy and consistency across reporting outputs, cutting turnaround time by 7% and lifting customer satisfaction by approximately 25%.
- Monitored key performance indicators across departments, flagging variances and anomalies to support proactive, cross-functional decision-making and drive performance gains across teams.

Manager, Operations

Aug 2021 – Mar 2023

- Tracked and analyzed operational and financial performance data, identifying inefficiencies and cost-saving opportunities that improved cost efficiency by 5%.
- Monitored budgets, costs, and transaction records across labour, materials, and subcontracts; supported a 16% revenue increase through disciplined variance tracking and reporting.
- Maintained data accuracy across compliance and safety documentation, coordinating audits and reviews that sustained a strong safety record and uninterrupted operations.
